

## Living Water Essentials C7

A Powerful 7-plate countertop model with internal filtration and a pH range of 2.6 to 11.0+, the C7 provides more options for healthier water.

## Living Water Essentials P3

The portable, 3-plate P3 countertop model offers a pH range of 5.5 to 9.5 in a slightly smaller, more economical water ionization unit.

## Living Water Essentials U7

Complete with readout and controls on a convenient faucet, the U7 offers all the power of the C7 in an undercounter configuration.

## Technical Information

- Model: ..... C7
- Electrodes: ..... 7
- Electrode Area: ..... 201 in<sup>2</sup>
- Electrode Type: ..... Platinum baked titanium
- Water Filtration: ..... Internal single filter (optional external water pre-conditioning)
- pH Range: ..... 2.6 to 11.0+\*
- ORP Range: ..... -250 to -700 mv
- Physical Dimensions: ..... W 9" x D 5" x H 12.3"

\* Actual pH output depends on source water TDS, pH and water flow. Use of the optional super charger cartridge may also be required.

- Model ..... P3
- Electrodes: ..... 3
- Electrode Area: ..... 67 in<sup>2</sup>
- Electrode Type: ..... Platinum baked titanium
- Water Filtration: ..... Internal single filter (optional external water pre-conditioning)
- pH Range: ..... 5.5 to 9.5\*\*
- ORP Range: ..... -250 to -400 mv
- Physical Dimensions: ..... W 9" x D 5.5" x H 11.8"

\*\* Actual pH output depends on source water TDS, pH and water flow.

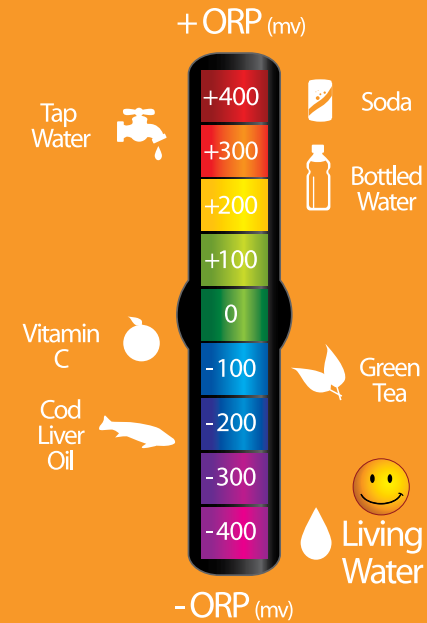

- Model: ..... U7
- Electrodes: ..... 7
- Electrode Area: ..... 201 in<sup>2</sup>
- Electrode Type: ..... Platinum baked titanium
- Water Filtration ..... Available (optional external water pre-conditioning)
- pH Range: ..... 2.6 to 11.0+\*\*
- ORP Range ..... -250 to -700 mv
- Physical Dimensions: ..... W 7.25" x D 9.25 x H 14.75"
- Full functionality counter-top faucet with LED display
- Lower-cost solenoid activated flush out
- Lifetime electrode and ceramic diaphragm

\*\* Actual pH output depends on source water TDS, pH and water flow.

- Automatic reverse electrolytic cell flush
- Automatic variable frequency step-less alkaline water regulating system (to accommodate different water qualities)
- Over-current/over-heat protection (C7 & P3 Only)
- Power saving circuit technology (C7 & P3 Only)

## Did You Say ORP?

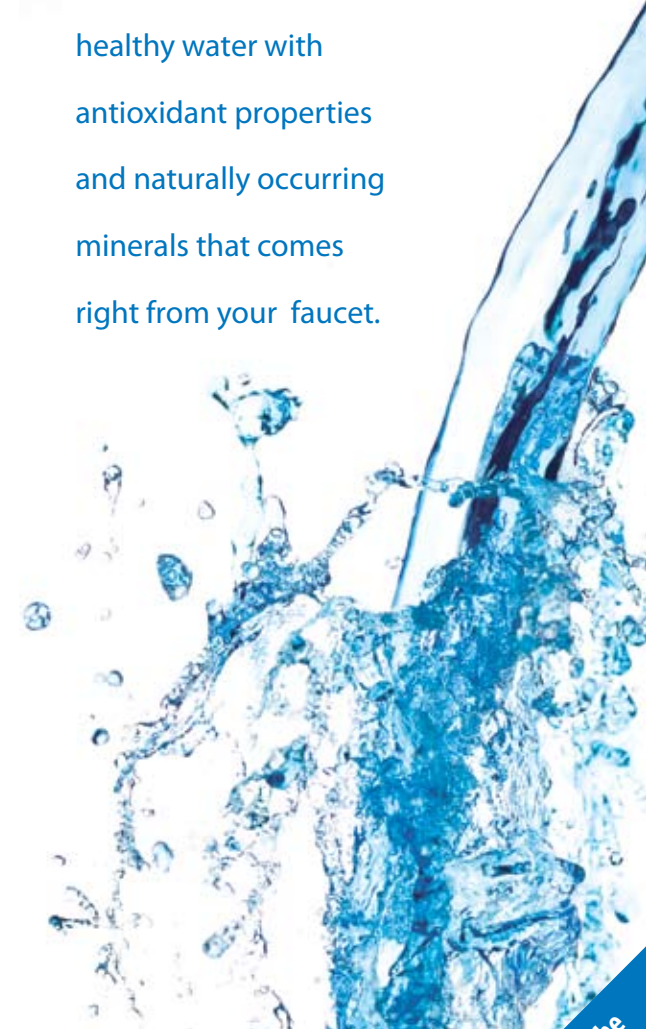

Have you heard of Oxidation Reduction Potential (ORP)? It's a way to measure if a solution (water) is oxidizing or not - above 0 is acid (oxidant), below 0 is alkaline (antioxidant). The farther below 0 you go, the greater the amount of antioxidant properties in your water, which means more for you with every sip.

Living Water Essentials produces water with ORP as low as -400, and that's a lot of Oxidation Reduction Potential in an everyday glass of water.

# living water:

Super-hydrating,  
pH-balancing, structured,  
ionized, detoxifying,  
healthy water with  
antioxidant properties  
and naturally occurring  
minerals that comes  
right from your faucet.

Are You Drinking the  
RIGHT Water?

US20974  
LWE\_BRO\_US20974-0809

Ask us how you can try Living Water, with no obligation.

## The right water

Drinking enough water isn't really enough. You have to drink the right kind of water - water that will help buffer acid, help remove toxins, and is easily absorbed by your body. You need great tasting water with antioxidant properties and proper pH levels.

When you're ready to give up the bottle and rethink what healthy water should be, you're ready for pH optimized, structured, ionized Living Water Essentials.

## Every day

Having a Living Water Essentials is like owning a limitless supply of alkaline, ionized, healthy water. You get pH-balancing, healthy alkaline water for drinking and cooking, strong alkaline water for washing vegetables, and acidic water for cleaning and disinfecting. When you have your own Living Water Essentials, you can enjoy the benefits of using water without chemicals for cleaning and washing, and the convenience and economy of using your own tap to provide healthier water to drink.

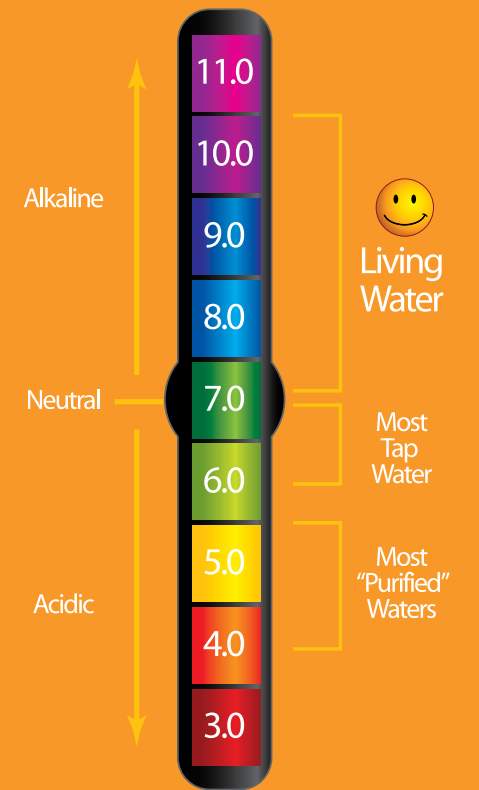

## For Your Health

When you drink alkaline water regularly, you're helping your body to hydrate itself as well as flush out toxins and waste products. If you're trying to lose weight, you may get a boost there as well. Overall, there's no better way to help stay healthy.

Do you drink at least half your body weight, in ounces, of healthy water every day?

Your body was about 80% water when you were born. As we age, we tend to become dehydrated and our bodies acidify. You can help fight the effects of aging simply by drinking the proper amount of the *right* water everyday.

## Acid or Alkaline?

You already know your body is more water than anything else. The question is, what kind of water is it?

Even if you drink enough water every day (and not many of us do), has it ever occurred to you that your bottled or purified water may actually be acidic?

If drinking acidic water seems as bad to you as it does to us, we would like to introduce you to water the way it should be: basic, natural, and essential.
